Spectacular village house, in need of total renovation, only a few metres from the centre. The original floors of the house have been preserved as well as the high solid wood doors. The house has two floors and is distributed as follows: Ground floor; Generous entrance hall, with old water deposit and storage room, large bedroom with living room connected to a second bedroom through a sliding wooden door easily divisible, a hallway with several seating areas leads to a spacious dining room with access to the outside patio and a large storage room. Next to the storeroom, there is a complete bathroom, an old kitchen and finally a living room with fireplace. A staircase leads to the first floor, totally diaphanous and big enough to be converted into 3 more bedrooms and two bathrooms. The property needs a change of roof and modernisation of the

interior, although the perfectly preserved rustic materials make this property an exclusive home for lovers of stately homes with their character of yesteryear.~ ~
